### **Job Description:**

As an AI Software Developer at Biocube.ai, you will play a pivotal role in designing, developing, and implementing AI-driven solutions to address complex business challenges. You will work closely with cross-functional teams to understand requirements, design architectures, and deliver robust AI software applications that meet the needs of our clients. Your primary responsibilities will include:

- Collaborating with data scientists and other stakeholders to translate business requirements into technical solutions.
- Designing and building scalable AI API's and pipelines for data preprocessing, feature engineering, and model training.
- Integrating AI models into production systems and deploying them using Flask and other tools.
- Knowledge of cloud computing (AWS/Azure/GCP) and Linux based Operating systems is must.
- Creating interactive dashboards and visualisation tools using Power BI, Streamlit, Tableau or similar frameworks.
- Conducting performance tuning and optimization to ensure the efficiency and reliability of AI applications.
- Staying current with the latest advancements in AI and machine learning technologies and applying them to enhance our products and services.

## **BioQube Matrics Private Limited**

### Qualifications:

- Bachelor's or master's degree in computer science, Engineering, or a related field.
- Proven experience in software development, with a focus on AI and machine learning applications.
- Proficiency in Python programming and experience with libraries such as TensorFlow, PyTorch, or scikit-learn.
- Strong knowledge of SQL and database management systems for data manipulation and analysis.
- Experience in building interactive dashboards and visualisations using Power BI, Tableau, or similar tools.
- Familiarity with web development frameworks such as Streamlit & Flask for building RESTful APIs.
- Excellent problem-solving skills and the ability to work effectively in a collaborative team environment.
- Strong communication skills and the ability to articulate complex technical concepts to non-technical stakeholders.

### Preferred Qualifications:

- Experience with cloud platforms such as AWS, Azure, or Google Cloud Platform.
- Knowledge of natural language processing (NLP) and computer vision technologies.
- Familiarity with DevOps practices and tools for continuous integration and deployment (CI/CD).
- Contributions to open-source projects or participation in AI-related communities.
