Job Summary:
We are looking for an experienced Android Application Developer with 5+ years of experience to join our innovative team. The ideal candidate should be proficient in Flutter, Kotlin and React Native and have a solid understanding of mobile app development best practices. You will be responsible for building and maintaining high-quality, scalable Android applications that meet our business needs. The role requires a quick learner who thrives in a fast-paced startup environment and is eager to contribute to all stages of the product lifecycle.

Key Responsibilities:

- Develop, test, and maintain Android applications using Flutter, Kotlin, and React Native.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Optimize applications for performance, scalability, and user experience.
- Ensure the best possible performance, quality, and responsiveness of applications.
- Troubleshoot and resolve complex technical issues and bugs promptly.
- Implement modern design patterns and architectural principles in application development.
- Work with RESTful APIs to connect applications to backend services.

- Utilize GIT for version control, ensuring efficient collaboration and code management.

Email: info@bioqube.ai
Website: www.bioqube.ai
Corporate Office Address: B-92, Sector 63, Noida - 201301, UP, India

- Stay up-to-date with the latest industry trends, technologies, and best practices in mobile development.
- Contribute to all phases of the software development lifecycle, including requirements gathering, design, development, testing, and deployment.
- Adapt and respond to the dynamic needs of a startup environment, taking on multiple responsibilities as needed.

Qualifications:

- Bachelor's degree in Computer Science, Engineering, or a related field, or equivalent experience.
- 4-5 years of experience as an Android Application Developer.
- Proficiency in Kotlin with a strong understanding of Android SDK and core frameworks.
- Experience with Flutter and React Native for cross-platform mobile development.
- Strong knowledge of mobile UI/UX design principles, patterns, and best practices.
- Familiarity with RESTful APIs, third-party libraries, and APIs.
- Proficient in GIT and version control practices.
- Experience with performance and memory tuning of Android applications.
- Solid understanding of the full mobile development lifecycle.
- Ability to work independently and manage time effectively in a startup environment.
- Strong problem-solving skills and a proactive approach to challenges.
- Excellent communication and teamwork skills.

Preferred Skills:

- Experience with CI/CD pipelines for mobile applications.
- Knowledge of Android Jetpack components.
- Familiarity with agile methodologies and DevOps practices.
- Experience with unit testing and automated testing frameworks.
- Understanding of cloud services (Firebase, AWS, or Google Cloud)

Why Join Us?

- Work on cutting-edge technologies and impactful projects in a fast-growing startup.
- Collaborative and flexible work environment.
- Opportunity to take ownership of your work and make a real impact.
- Competitive salary and benefits package.

How to Apply:
Interested candidates should submit their resume and a cover letter outlining their relevant experience and why they are a great fit for this role to hr@bioqube.ai
